# It's Now Time for FALL PLANTING

Fall is the only season of the year to plant the bulbs that bloom in spring. IT MUST BE DONE NOW or you will lose another full year. Yet nothing really is easier than to provide a glorious display from bulbs. They need such little care and are so showy. Their culture is simple and they do well under widely different conditions of soil and climate.

## Plant NOW to Bloom THIS Fall

Few gardeners realize that bulbs of Colchicum (Meadow Saffron), Sternbergia (Autumn Daffodil), and the Fall-Flowering Crocus will bloom late this fall if the bulbs are planted soon. All three are hardy and will live for many years.

## To Bloom next Spring and Summer

Start off the season's parade with Snowdrops, Eranthis, Chionodoxa, Crocus, Scilla, Muscari, and Erythronium. Continue the show with Tulips, Daffodils, and Hyacinths. Among the Tulips the Single-Early and Double-Early kinds flower first. Before these pass the beautiful new Triumph Tulips are in bloom to last until the May-flowering types—Darwin, Breeder, and Cottage—reach their prime. Always admired for their exotic beauty are Brodiaea, Calochortus, Fritillaria and the rare Spring Starflower or Triteleia. Include Camassia, Leucojum (Snowflake), and the stately Eremurus to add some special interest.

## For Winter-Blooming Indoors

Have Paper-White Narcissus blooming in the house all through the winter and early spring. Place several bulbs in a bowl filled with pebbles and water and start a new container every two weeks to provide a continuous succession of flowers. The showy Soleil d'Or Narcissus and the Chinese Sacred Lily also are easy to grow in a cool room. Hyacinths are another favorite of simple culture. And there are many others for the gardener who has a conservatory or a room where the temperature can be held at 45° to 60° F.

## Quality at Reasonable Prices

Gardeners know that quality is the most important single factor to success and they also know that quality goods are the cheapest in the end. The slightly higher cost of top-size quality bulbs is insignificant yet it makes the difference between an outstanding success and just fair results. Dreer Quality Seeds, Plants, and Bulbs are priced extremely reasonable.

We know that they will give the kind of results which your work and interest deserve. Small-size bulbs offered at bargain prices always bring disappointment to the gardener who takes pride in his work.

## You Are Cordially Invited

to visit the Dreer Nurseries at Riverton, New Jersey. Riverton is only 8 miles from Philadelphia and is easily reached by auto, bus, or train. You will be amazed at the extensiveness of our operations. Though widely known as "Dreer's Nurseries" you will find 10 acres of greenhouses containing what is conceded to be one of the finest commercial collections of plants in the world. If it is Roses that interest you primarily the Rose Garden of more than 500 varieties will be a revelation from late September until frost. The new Display Garden of Annuals, Summer-Flowering Bulbs, and Perennials has been referred to by a leading horticultural authority as "Dreer's Living Catalog".

## Dreer's Guide to Autumn Gardening

By all means **order early** though you may not intend planting for a month or two. You are then certain of receiving all the things you want this fall. The dates given below necessarily must be approximate as they depend upon climatic conditions. Where winter sets in early plant as soon as possible.

### August

This is the month to plant the fall-flowering bulbs like Colchicum, Fall-Flowering Crocus, and Sternbergia. Liliun candidum also does well if planted at this time. Early August is a good time to start Pansy seed and seed of other quick growing biennials. *Late August or early September is the best time to start a new lawn or reseed the old one.*

### September

It is still time to plant the bulbs of Colchicum, Fall-Flowering Crocus, and Sternbergia. The earlier they are planted now the better they will be. If you did not sow your new lawn or repair the old one during late August do so now or as soon as possible. This is the most important month for planting bulbs in the garden to bloom next spring including Hyacinths, Narcissus, Anemone, Brodiaea, Calochortus, Camassia, Chionodoxa, Spring Crocus, Eranthis, Erythronium, Fritillaria, Leucojum, Liliun candidum, Eremurus, Muscari, Ranunculus, Snowdrops, Scilla, Spring Starflower (Triteleia), and Iris reticulata. Late in the month plant Dutch and Spanish Iris. Start Lilies indoors, also Calla, Babiana, Baby Gladiolus, Freesia, Ixia, Leucocoryne, Ornithogalum, Sparaxis, and Tritonia. Where winter sets in early sow the seed of hardy perennials marked in this catalog \*. Where winter is a long way off other quick growing perennials can still be started from seed.

### October

All the bulbs recommended for September planting can still be started this month as long as the ground is not frozen. But even in colder sections October planting is possible where the soil in the beds has been covered with leaves, straw, corn stalks, or any other loose matter that will keep the frost out until the bulbs or plants are available. *October is the most important month for planting Tulip bulbs.* Continue indoor planting of all bulbs that will bloom in the house during the winter and spring. By the middle of the month perennial plants, shrubs, and climbers are available and during the latter part dormant Roses should go in the ground. Just before the soil in the seed bed or cold frame freezes sow seed of the perennials marked with a \* in this catalog. By the middle of the month begin your first planting of Paper White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lily indoors. Make sure you have sufficient bulbs of these to make succession plantings two weeks apart until mid-March. *This is the month to plant Lily bulbs.*

### November

Continue planting Lilies throughout this month. There is still a chance to plant the many types of bulbs recommended for September and October planting, also perennial plants, shrubs, climbers, and Roses, as long as the ground is free from frost.

### December

Throughout December start bulbs of Paper White Narcissus, Soleil d'Or Narcissus, Chinese Sacred Lily, Amaryllis, Lily of the Valley Pips, and all tender bulbs for blooming indoors in the house.

# Fascinating Triumph Tulips

## A Glorious New Giant-Flowered Race

Algiba is typical of the splendid vigorous habit found in all the Triumph Tulips. It is an appealing clear heliotrope color that has real charm.

This new race of Tulips brings to our gardens giant blooms in colors and color combinations distinctly different from all other Tulips. Furthermore they bloom within the interim of the Early Single varieties and the Cottage, Darwin, and Breeder classes so that now one may have a continuous display of Tulips throughout the spring. They are of sturdy compact growth and exceptionally colorful.

**Algiba.** We selected this variety for its exceptionally clear heliotrope color. While it is a trifle dwarfier than the others its robust habit and large size are outstanding. 16 inches. 3 for 25c; 12 for 85c; 100 for \$6.00.

**Aviateur.** A brilliant carmine with a wide creamy white border. The inside is garnet-red relieved by the light border at the petal edges. Very showy. 20 inches. 3 for 30c; 12 for \$1.00; 100 for \$7.25.

**Ribera.** We recommend this particularly attractive new Tulip because of its striking color effect. The well-formed large blooms are bright yellow, mottled and stippled with Fuchsia red. 22 inches. 3 for 27c; 12 for 90c; 100 for \$6.50.

**Zimmerman.** A splendid tall vigorous grower of an enchanting vivid pure rose, cast over a creamy ground and finished with a deeper rose tone at the upper edges. 23 inches. 3 for 25c; 12 for 85c; 100 for \$6.00.

# Hardy Flowering Bulbs

Hardy bulbs bring to our gardens a wealth of colorful flowers. All of them are easy to grow and those which flower during the early spring are particularly welcome. Though they are small they are truly beautiful. Take for example the Snowdrops, Chionodoxa, or Crocus that greet us soon after the last of the snow has melted. Scillas and Grape Hyacinths continue the procession with Fritillaria, Lily of the Valley, Anemone, Calochortus, Erythronium, Leucojum, and Rannunculus providing a succession that leads up to the early summer-flowering plants. For blooming this fall plant Colchicum and Fall-Flowering Crocus without delay.

## Giant Poppy-Flowered Anemones

We have endeavored to make Dreer's Bulb Catalog a helpful and instructive guide to your fall planting problems. On page 2 you will find "Dreer's Guide to Autumn Gardening" and we suggest that you plan your fall operations keeping in mind that the monthly directions are based upon conditions similar to those of the Philadelphia vicinity. For every 100 miles north you may advance the planting date one week and for an equal distance south delay the planting for a week.

Throughout the book you will find handy information that gives you not only the height and flowering season but also tells you how deep and far apart to plant various kinds of bulbs.

Careful planning will help you to secure the finest display. Order early to secure all the varieties which appeal to you most.

## Early-Flowering SWEET PEAS

*Orchid or Spencer Varieties for the Greenhouse and Outdoor Fall Sowing*

The early-flowering type of Sweet Peas is most valuable for growing in the greenhouse to give lovely flowers during the winter and early spring. But they also may be sown outdoors in the fall in our extreme southern states and in sub-tropical countries where the summer-flowering varieties will not bloom satisfactorily. Dreer's Summer-Flowering mixture sown in the north late in the fall will bloom the following spring.

**Early Fall  
is the  
Ideal Time to Sow**

# Dreer's New Improved Lawn Grass Mixtures

The extra-heavy bushel weight of Dreer's New Improved Lawn Grass Mixtures will prove a distinct advantage to all who sow them. The heavy weight of these splendid mixtures means that every pint, quart, peck, etc. contains so much more virile and heavy seed—insuring a perfect stand of grass. Needless to say only the finest varieties of grasses are used in preparing these mixtures. They are free from kinds that produce clumps or knots that spoil the even smooth effect of the lawn. All of them are permanent and fine-bladed.

## Why You Should Sow in the Fall

Early fall is the ideal time to sow a new lawn or resow the old one. Germination is certain and the young plants benefit by the usual autumn rains and the cool nights. Sunshine is abundant, yet it is a warm kindly sun that does not burn like the scorching rays of late spring and early summer. Fall and Crab Grass have done their worst and cannot sprout unexpectedly to choke out the finer growth. Summer droughts are a full year away.

## "The Dreer" Lawn Grass

*The Unequaled Mixture for a Beautiful Lawn*

Where a fine-bladed, dense, rich green lawn is wanted we recommend the Dreer Lawn Grass as the finest and most satisfactory mixture that can be obtained. It will give a perfect lawn because it includes the correct proportion of grass seed varieties which make a dwarf compact growth and have a rich green color. The Dreer Lawn Grass has been prepared in accordance with our own special formula which has proved to give a smooth velvety lawn of finest texture free from any coarse grass that would spoil the good effect. All the grasses included are permanent and of good color. They are strictly lawn grasses of first quality. Each variety included serves a special purpose. The strong fibrous roots of certain ones take hold of the soil and contribute considerably towards the permanence of the sod. Others of creeping habit weave the sod into a thick-textured carpet of green that can stand considerable trampling and give good protection against heavy down-pours. The Dreer Lawn Grass is the ideal mixture for large estates as well as for the home lawn where beauty is considered paramount.

Pt. 30c; qt. 50c; 2 qts. 90c; 4 qts. \$1.70; peck \$3.25;  
½ bu. (12½ lbs.) \$6.25; bu. (25 lbs.) \$12.00; 100 lbs. \$47.00, prepaid.

## "Evergreen" Lawn Grass

Though less expensive than the Dreer Lawn Grass this mixture gives exceptionally fine results. It produces a beautiful and permanent lawn of rich green color and velvety appearance. If not cut too short and well watered during the dry season it can be depended upon to give entire satisfaction. It is blended according to our own special formula.

Pt. 25c; qt. 40c; 2 qts. 75c; 4 qts. \$1.30; peck \$2.50;  
½ bu. (12½ lbs.) \$4.90; bu. (25 lbs.) \$9.50; 100 lbs. \$37.00, prepaid.

## "Fairmount Park" Lawn Grass

This is our special low-priced mixture suited to various soil conditions. It gives good results even on small city grass plots where the soil frequently is stiff and heavy. Forms a thick turf in a short time and it is well suited to all spaces receiving considerable hard wear. Also suited to embankments and terraces.

Pt. 20c; qt. 35c; 2 qts. 65c; 4 qts. \$1.15; peck \$2.20;  
½ bu. (12½ lbs.) \$4.00; bu. (25 lbs.) \$7.50; 100 lbs. \$29.00, prepaid.

## "Shady Place" Lawn Grass

Shaded areas should be seeded with this special mixture which contains varieties naturally suited to these conditions. It consists of extra-fine, heavy, and choice seed which will produce a thick and rich growth of deep green. The shaded lawn located under trees should be fed at regular intervals and properly watered to insure a vigorous growth.

Pt. 30c; qt. 55c; 2 qts. \$1.00; 4 qts. \$1.90; peck \$3.50;  
½ bu. (12½ lbs.) \$6.50; bu. (25 lbs.) \$12.50; 100 lbs. \$49.00, prepaid.

## "Terrace" Lawn Grass

The use of our special Terrace Lawn Grass Mixture will prevent the many annoying features caused by the use of an ordinary mixture. It contains deep-rooting grasses that hold the soil in place and among them is Bent Grass that makes a strong mat of rich green turf. Cover with burlap or cloth until the seed is sprouted.

Pt. 30c; qt. 50c; 2 qts. 90c; 4 qts. \$1.70; peck \$3.25;  
½ bu. (12½ lbs.) \$6.25; bu. (25 lbs.) \$12.00; 100 lbs. \$47.00, prepaid.

## "Seashore" Lawn Grass

A rich green lawn is especially desirable at the Seashore but success depends entirely upon sowing a mixture that contains the proper varieties. As grass will not grow in pure sand a top dressing of a 2 to 4 inch layer of good top soil is essential to success.

Pt. 25c; qt. 45c; 2 qts. 85c; 4 qts. \$1.60; peck \$3.00;  
½ bu. (12½ lbs.) \$5.75; bu. (25 lbs.) \$11.00; 100 lbs. \$43.00, prepaid.

## "Golf Links" Grass

The thick rich green mat produced by this mixture will stand the hard usage suffered by the average fairway, teeing ground, football and polo field, or other athletic ground.

Pt. 25c; qt. 40c; 2 qts. 75c; 4 qts. \$1.30; peck \$2.50;  
½ bu. (12½ lbs.) \$4.90; bu. (25 lbs.) \$9.50; 100 lbs. \$37.00, prepaid.

## "Putting Green" Mixture

The varieties comprising this mixture are fine-bladed, low growing, and the most hardy kinds that retain their rich green color throughout the season. Also excellent for tennis courts or wherever a billiard table smoothness is necessary.

Pt. 40c; qt. 75c; 2 qts. \$1.40; 4 qts. \$2.40; peck \$4.50;  
½ bu. (12½ lbs.) \$8.50; bu. (25 lbs.) \$16.50; 100 lbs. \$65.00, prepaid.

## "Southern" Lawn Grass

Heretofore it has always been more or less difficult in tropical or semi-tropical climates to keep the lawn attractive. Dreer's Southern Lawn Grass mixture is composed of grasses that are particularly suited to such climes. Bermuda grass is one of its many components. Where the lawn is properly fertilized and watered this mixture will give splendid success.

Pt. 25c; qt. 45c; 2 qts. 85c; 4 qts. \$1.50; peck \$2.75;  
½ bu. (12½ lbs.) \$5.25; bu. (25 lbs.) \$10.00; 100 lbs. \$39.00, prepaid.

## White Dutch Clover

Those who prefer an extra-heavy stand of clover should sow 2 to 4 ounces of it to each quart of grass seed. Sow separately from the grass in order to secure even distribution.

Oz. 10c; ¼ lb. 25c; ½ lb. 40c; lb. 75c; 5 lbs. \$3.50; 10 lbs. \$6.75;  
25 lbs. \$16.00, prepaid.
